

All-in-one Instrument ... and Move !

Geonav 4 Gipsy, be on the move anywhere in the world with this all-in-one instrument! “Gipsy at sea and on land”, the Gipsy represents freedom of movement to any destination.

The Gipsy from Geonav is an innovative waterproof handheld GPS weighting less than 300 grams, with an outstanding battery life of 9 hours. It is by far the best choice for a professional GPS plotter, also thanks to a large and bright transfective 3.5” backlit TFT LCD, with a resolution of 240 x 320 pixels. The 4 Gipsy offers outstanding graphical performance and visibility in all conditions including direct sunlight.

Enjoy the exceptional functionality of the Geonav 4 Gipsy, fully compatible with all Navionics cartography (2D and 3D): visual and acoustic anchor alarm, autozoom, easy view, own ship position window, runway window, tide & current data, goto port, marker and service functions, overzoom, power saving mode, chart rotation, screen amplifier, and more!

The way to any destination in the world is always in the palm of your hand!

The innovative technology of Geonav plotters, combined with the matchless performance of Navionics charts, make the Gipsy an instrument which provides all the necessary information and support for navigating at sea, on land, by car, by boat, motorbike, bicycle or on foot. And, of course, it comes with a wide range of available accessories, such as: bike bracket, earphone, carrying case, car bracket, boat bracket, etc. Please refer to product details for further information.
