

“SPECIAL MENTION” FOR GEONAV 4C TO THE METS 2003

GEONAV is glad to inform to have received a “special mention” to the recent Marine Equipment Trade Show (METS) in Amsterdam for the brand new **GEONAV 4C**.

“In an era of ever-smaller handhelds – we read on the motivation - the **GEONAV 4C** colour GPS plotter from GEONAV, division of Navionics Sp, Italy surprises with its larger size but offers ease of use, good facilities and sits comfortably in the hand”.

Since its introduction in 1991, the DAME (Design Award METS) is considered one of the most prestigious acknowledgements in the marine field.

Besides the winner for each category, there is also a series of special acknowledgements, called “special mention”, that indicate products with peculiar features.

Among 170 competitors, **GEONAV 4C** achieved one of the four special mentions in the electronic category.

GEONAV 4C, which also means “for sea”, is equipped with a 3.5” colour sunlight visible display, can be used as a portable or fix GPS and can be connected to the autopilot and the transducer.

Completely waterproof, **GEONAV 4C** uses Navionics GOLD cartography.
