

GEONAV 5C START OF SALES

GEONAV is glad to inform that the brand new **GEONAV 5C** will be available on the market since next December 10th.

As in the best GEONAV tradition, this instrument is characterized by ease of use and, thanks to the Compact Flash™, can store an unlimited number of waypoints, markers and trackpoints.

Equipped with an integrated GPS antenna and with an LCD 4.8" colour daylight and backlit display, it is supplied with bracket, user manual and sun cover.

The function *Easy View*, which allows to enlarge the icons and the names of places, the window *Run Way* that can visualize the cross track deviations, the information about the port plans and the tides and currents predictions are features that make **GEONAV 5C** able to offer the same performances of the great plotter to be installed.

GEONAV 5C uses Navionics GOLD cartography.
