

Viareggio, November 15th 2005

**Geonav Electronic chartplotters
Optimal performance with new award winning
3-D Navionics Platinum charts**

The Geonav plotter line 4C, G4C-XS, 7C, 10C, 11C and Multy are well prepared for the latest generation of Navionics Platinum charts.

Navionics Platinum is changing the way boaters use chart plotters and cartography by integrating 3-D cartography with a variety of information sources including satellite and panoramic photos, coastal pilot books, coastal roads maps and more.

Navionics Platinum is available in large XL3 coverage areas, the seamless integration of three cartography zones. With up to 16 times more information than competitors' technology, Platinum multidimensional cartography and extensive informational database is distributed on 2GB chart cards. Navionics Platinum offers multi-dimensional cartography and is available for stand alone chart plotters.

Navionics Platinum recently received the NMMA (National Marine Manufacturers Association) 2005 Innovation award for Electronics. It is also nominated for the DAME (Design Award Mets) award.

As of January a free update to Platinum will be available on the Geonav website for chart plotters already in use. Of course the existing Gold Cartography can still be used.

The suggested retail price of the Navionics Platinum XL3 chart is € 499.- excl. VAT.

Navionics Platinum is available through Geonav from January 2006. Authorized dealers for Europe can be found through www.geonav.it.

GEONAV srl will be present at the METS - Amsterdam -Nov. 15th-17th
STAND 1.837
