NEW AUTOPILOT GEONAV AP201

GEONAV is proud to introduce **GEONAV AP201**, a new, compact autopilot, specially designed for sailing and motorboats up to 13 metres.

With reduced dimensions (110 mm x 110 mm), **GEONAV AP201** was designed with a compact Control Unit and a wide and highly visible display.

Easy to install, even with limited space **GEONAV AP201** comes with an intuitive and easy to use keyboard.

The processor box is able to provide automated control of the vessel's heading and gives a precise reading of the rudder's position, enabling you to check and change the route at any moment.
